Projects

1. Alumni Event Management Systems ⧉ | Spring MVC, Spring JDBC, MySQL, Bootstrap   **08 2024**

- The project aims to provide an interactive platform where alumni can register, login, profile update, participate in events, share feedback, and stay connected with their college. The project ensures secure data handling using MySQL for the database, with Spring MVC handling the web layer, Spring Core managing application services, and Spring JDBC managing database operations
- Live Site

2. Car Garage Management System ⧉ | Core Java (Collection)   **04 2024**

- The Car Garage Management System was developed to streamline and automate the operations of a car garage or workshop. The project focuses on managing various garage activities, including customer registrations, vehicle service bookings, inventory management, and invoicing. The system provides modules for managing customer information, vehicle details, and service records.
